# Direct purchasing process thanks to automatic ordering system

Product selection

## Superior E-Commerce Services

With a fast, automated system, SECOS guarantees real-time purchasing. This enables you to concentrate on other essentials, i.e. your products and markets.

With the help of the most varied functions, SECOS lets you identify the parts you need, clearly and fast.

Ordering

## Product selection

The electronic spare parts catalogue for machines and entire plants, based on exploded drawings, offers you the comfortable selection of parts and components. Customer-specific machine-lists are available for precise selection.

A product shop with background pictures for components lets you select articles which are defined for your requirements and production processes.

Shipping package

## Order process

Ordering by direct input means you can order those articles you are already familiar with by simply entering the article numbers.

B2B stands for Business to Business and is the direct communication between you and us. The B2B solution allows fully-automatic communication between your system and the Oerlikon ERP system.

Outgoing goods

### **Updated**

SECOS makes real time information available. Current prices and availability are ensured thanks to permanent updating.

Your agreed payment terms are also valid for orders via SECOS. As a further service and in order to speed up the delivery process, it is also possible to pay by credit card.

Shipment by airfreight

### **Delivery process**

Using SECOS ensures the shortest delivery time possible.

Order tracking means you can track the progress of your delivery by courier.

Delivery

### **Winning points**

All these advantages means that you as registered SECOS user :

- have available an efficient, fast ordering process
- can optimize your own warehouse
- gain time and flexibility

In brief, SECOS considerably reduces the time and money you spend. Which has a direct effect on your plant's productivity.

# Individual, secure and overall

## **Up to date thanks to 24-hour availability**

SECOS' 24-hour availability provides users with access to the most up-to-date information with regard to the Oerlikon original parts. Time differences are no longer your problem.

As a SECOS user, you are always up-to-date regarding:

- constantly updated product specifications
- latest special offers at reduced prices
- availability of product-related modernization kits and conversions.

## **Easy-to-use, uniform system**

The clearly structured and easy-to-use SECOS navigation is a further advantage. The system can be operated in nine languages: Arabic, Chinese, German, English, French, Italian, Portuguese, Spanish and Turkish.

All the Oerlikon companies use SECOS with one single access platform.

## **Data archive mySECOS**

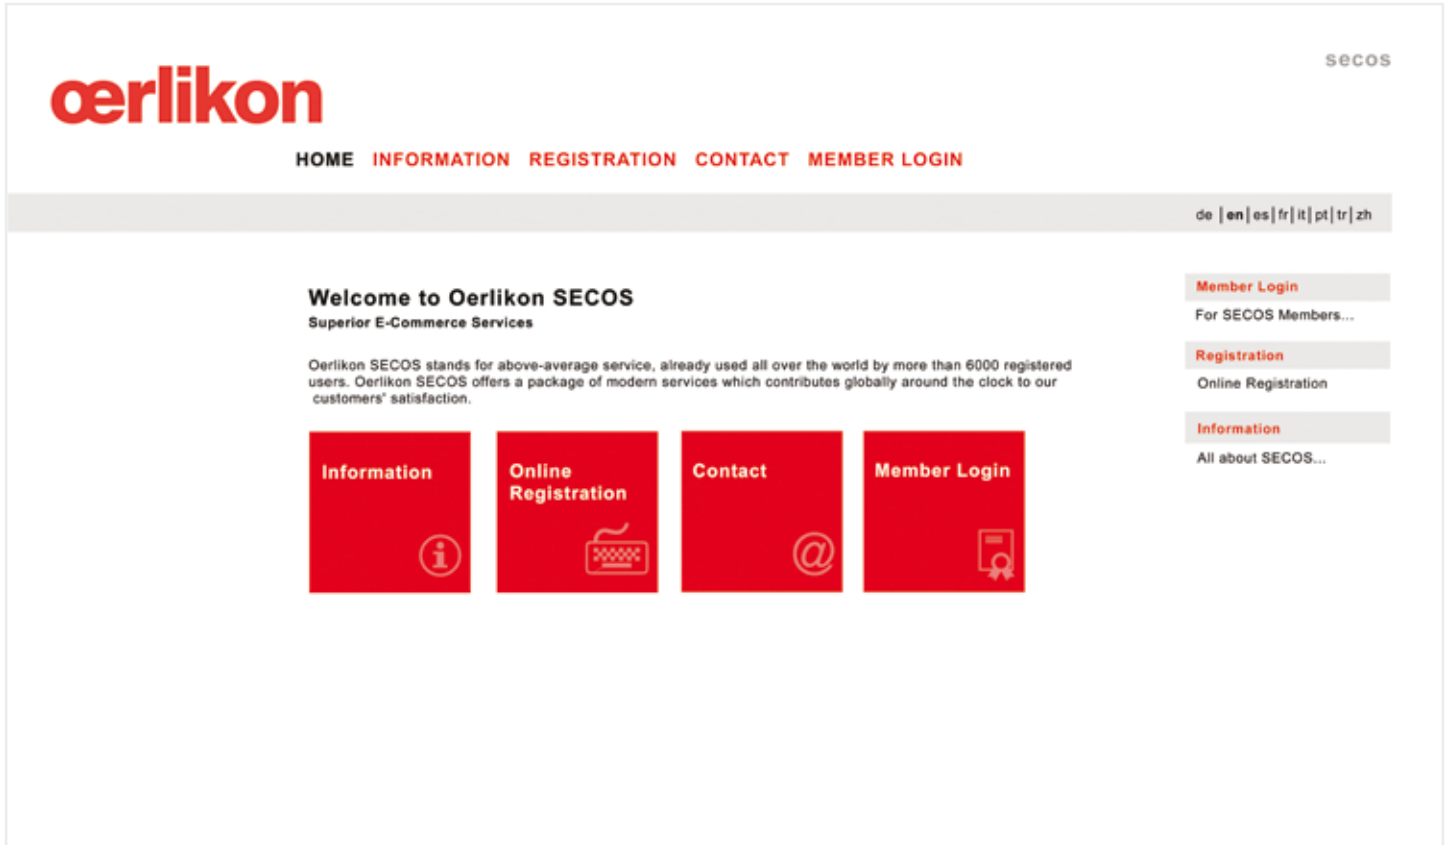

With the data archive mySECOS, you can manage all the relevant data for the ordering process. All the information regarding your SECOS correspondence, such as inquiries, orders, deliveries, invoices, etc. is filed here.

So there's no more time-consuming searching.

## **State-of-the-art security standards provides protection from unauthorized access**

No need to worry about unauthorized access. With its state-of-the-art security standards such as user authentication, SECOS guarantees protection from access by third parties. The data is protected during the data transfer by secure 128-bit encoding.

# Straight to the target

## How to access SECOS

You need a standard commercial PC with a current browser and a stable Internet connection. You will receive everything else directly from your Oerlikon company. Purchasing and installation are just as simple as the system.

Send us your SECOS registration, we will send you all the documents and personal access data. Information can be found under [www.secoss.myOerlikon.com](http://www.secoss.myOerlikon.com)
